### SUMMARY

Python Backend Developer skilled in Python, FastAPI, REST APIs, PostgreSQL, Docker, and Git. Experienced in building scalable backend applications, designing database schemas, implementing authentication systems, and containerizing applications.

### SKILLS

- Programming Language:** Python
- Backend:** FastAPI, Rest APIs
- Databases:** SQL, PostgreSQL
- Tools:** Git, Github, Linux, Docker
- CS Fundamentals:** Operating Systems, Computer Networks, DBMS, OOP

### PROJECTS

- Job Application Tracker & Referral System**  
Tech Stack: Python, FastAPI, PostgreSQL, Docker, Git
- Description:**
- Developed RESTful APIs for job application and referral tracking.
  - Implemented JWT-based authentication and role-based access control.
  - Designed PostgreSQL database schema for users, jobs, referrals, and applications.
  - Containerized the application using Docker.
- Personal Finance Expense Tracker API**  
Tech Stack: Python, FastAPI, PostgreSQL, Docker, Git
- Description:**
- Built APIs for income, expense, and budget management.
  - Implemented secure user authentication and authorization.
  - Generated monthly spending reports using database aggregation queries.
  - Developed scalable backend architecture using FastAPI and PostgreSQL.
